

KNIFE GATE VALVE DUCTILE IRON BODY

THROUGH CONDUIT KNIFE GATE VALVE WITH DOUBLE ACTING PNEUMATIC ACTUATOR DUCTILE IRON BODY - BETWEEN FLANGES PN10

APPLICATION

The conduit knife gate valve is particularly suitable for stationary applications: pulp outlet after pulping and defiberizing, purification consisting in isolating impurities such as varnish, paint, glue, staples or others..

Areas of application: paper-cardboard recycling units, paper factory, chemical plant.

Fluids: water, paper pulp, fibrous products.

GENERAL CHARACTERISTICS

Range: from DN50 to DN400.

- Rising stem knife gate valve with longer body
- Bidirectional sealing with two parts (half-body) assembled by bolting.
- Small retention zone, absence of product deposit in the body
- Full bore in the open position
- Excellent sealing when the valve is closed
- Standard polished gate, soft contact with the gaskets
- Gate comes out on the outside of the body in the valve lower part
- With additional stuffing box system in the lower part
- Very resistant ductile iron packing flange avoids risks of breaks.
- Operating force reduced thanks to the elasticity of the gaskets.
- Preformed profiled sheet support plates from DN50 to DN300 for accessory or kit mounting.
- Full flow when fully opened, ensuring a high flow rate with low head loss.
- Flow regulation possible for pasty or abrasive fluids with installation of a deflector.

Design	Manufacture according to the requirements of the European directive n° 2014/68/UE «Equipment under pressure» : modulate H.
Face to face	Face to face dimension according to standard
Connection	Mounting between flanges in accordance with EN1092-2 and ISO 7005-1 : ISO PN10
Tests	Pressure test according to standards EN12266-1, DIN 3230, BS 5154 and ISO 5208.. - Body : WP x 1.5 bar - Seat : WP x 1.1 bar

PRODUCT APPROVALS

KNIFE GATE VALVE DUCTILE IRON BODY

THROUGH CONDUIT KNIFE GATE VALVE WITH DOUBLE ACTING PNEUMATIC ACTUATOR DUCTILE IRON BODY - BETWEEN FLANGES PN10

CONSTRUCTION

The valves are coated with epoxy paint to protect them against corrosion

Component	Coating
Body (1)	Epoxy powder RAL 6005 150 microns
Support plate (8)	Epoxy liquid RAL 6005 70 microns
Packing gland (7)
