

MAIN FEATURES

The pneumatic knife gate valve is intended for the automatic shut off of pipes of the heavy fluids like slurries and powders. The main fields of application are the water treatment, the paper industry and the food industry. The in-line tightness can be both uni- or bi-directional and several versions of the valve are available. The double effect pneumatic actuator allows the remote control of the valve. The pneumatic valve can be installed either indoor or outdoor. The movement of the gate is protected by lateral covers. Numerous options are available on the valve or on the actuator.

AVAILABLE MODELS

170/171 : cast iron body, stainless steel gate, NBR seat (S-170), EPDM (S-171)

172 : stainless steel body, stainless steel gate, EPDM seat

174 : cast iron body, stainless steel gate, Metal seat, under silo knife gate valve

176 : cast iron body, stainless steel gate, metal seat (in-line leakage: 2% kvs)

177/178 : cast iron body, stainless steel gate, EPDM seat (S-177), NBR (S-178), bi-directional tightness

179 : cast iron body, through-going stainless steel gate, EPDM seat, bi-directional tightness

Size 50 to 600, and Size 50 to 300 (S-179) wafer-lug mounting between flanges EN 1092 PN10 thread M. 6 bar compressed air supply

PNEUMATIC ACTUATION

The standard actuator are sized for following conditions:

- double effect linear actuator with aluminium body,
- 5 to 7 bar lubricated compressed air supply,

The operators are protected against the gate's movement by the lateral covers.

DN	Actuator's internal diameter Ø (mm)	Actuator's external diameter Ø (mm)	Actuator's volume (liter)	Air's ports TU

OPTION: USE IN HAZARDOUS EXPLOSIVE ATMOSPHERE

Optional, the S-GATE valve can be adapted for a use in hazardous explosive area. This version is registered as category 3 equipment following the CE ATEX 94/9 directive. It can be installed in the areas 2 and 22. The respect of the special instructions for mounting and maintenance of S-GATE valve in hazardous explosive atmosphere is mandatory.

Marking of the valve is following:

S-GATE®

ANNEE

REF

☐ II 3G / 3D TX

N° DE SERIE

☐

Respecter impérativement les instructions de montage et d'utilisation

"B" OPTION: SEAT BLOW OFF

This option makes possible the cleaning of the seat by compressed air blow off. The blow off frequency is piloted by a 2/2 NC solenoid valve.
